

“The Healthier Choice”

Safe Food for Canadians (COVID – 19)

We would like to thank all our customers for reaching out to us during a time when communities and the entire country, need to come together, in the initial stages of combating this challenge. Simply put, we know we will all take the appropriate steps and precautions to see this through.

Sealand has committed itself to addressing the needs of proper nutrition and security of our home delivery service by increasing our inventories, and at the same time, putting additional precautions in place for added safe checks of all of our staff and associates who personally deliver.

We will provide the best quality of direct supply from producer to you, via the safest and shortest path. This involves the least amount of food handling, where almost everything is immediately individually vacuum packed and flash frozen to ensure food safety and storage longevity.

We do personally hand deliver the product to you, as opposed to leaving it left by a stranger and unattended on your doorstep, as how you would receive it by grocery store deliveries. This ensures the safest and most secure path from producer to your home without the mass production and handling, which occurs prior to stock sitting for days or weeks on the grocery store shelves and in the cooler units which is open to the general public to handle unattended. In effort to help decrease crowds in shopping centres, please visit us online to bring high quality food directly to your door.

Please forward this to your friends and family and encourage them to shop online at sealandqualityfoods.com or give us a call at 1-855-312-2677.

We have noticed an increase in traffic flow to our website so please be patient knowing that our inventory will not deplete. You may need to click ‘refresh’ if images do not load.

Stay informed, stay healthy and stay safe.

Sincerely,

iQF/Sealand Quality Foods
